RG104 E-1 Box 181

The Mint of the United States at Philadelphia,

Superintendent's Office,

Chicago April 18 1893.

Col. A. C. Bosbyshell

Dear Sir.

Our boxes are all unloaded and placed around the space allotted the Mint so that tomorrow morning we will start installing and push matters as fast as possible.

I called upon Mr. Pierce the gentlemen in charge of the Electrical supply of the Fair in regard to having our motor wired up. He said that the conduits & wires were all in the building and that it would not take more than a day to make the connection, but that that could not be done

RG104 E-1 Box 181

until the Worlds Fair Commission would be made sure of the payment for current by some one who had authority to make such promise I then called on Jno. F. T. Beckwith Secy. of Gov. Board. in regard to the matter, he said that if Jno. Stocks would give him authority to make such guarentee he would do so, he advised me to lay the matter before you immediately so that you could confer with Jno. Stocks with as little delay as possible.

It appears that all moves have to come through Jno. Stocks.

I mailed you this morning five vouchers in duplicate covering our traveling expenses from Phila

RG104 E-1 Box 181

to Chicago. which Mr. Adams said were correct, and which he would pay as soon as received from Mr. Stocks with his afforal and his order for each one of us to make the trip to the Fair.

A sad thing occured at the Gov Building yesterday. when a man who had been sent by the Government to all words Fairs was crushed to death under one of the guns being put in place. The gun stands. just at the East end of the Building and while under it adjusting some of the machinery it fell on him completely crushing him

Very Respectfully

M. S. Beckley

RG104 E-1 Box 181

P.S. Mr. Price told me that in addition to the cost per horse power for current to run the motor, there would be an additional charge of fifteen dollars ($15.00 per HP) per horse power for wiring up.

M. S. B.
